

PEGATRON

Navigate the future 

Introduction to Pegatron and Asia Bay Research and Training Center

Timothy Lee, Ph.D. CFA MBA
Feb-2025

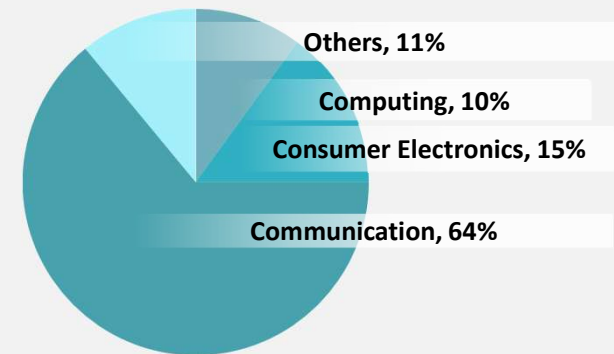

Worlding Leading Design and Manufacturing Service Company

Established on
Jan. 1st
2008

Headquarters
Taipei,
Taiwan

2023 Consolidated Revenue
**USD \$
40.3 Bn**

2023 Revenue Breakdown by Main Product Segment

Global
Operation Sites
20~

Total Number of
Employees
~100,000

2023 Fortune
Global 500
No. 333

Design and Manufacturing Service

Design Service

Design

- Positioning
- Architecture

Develop

- HW - ME - ID - SW
- Advance Engineering

Deliver

- Quality Control
- Production Verification
- Functional Verification

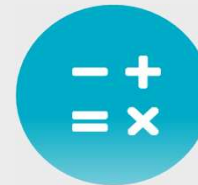

Manufacturing Service

**Flexible and Rapid
Deployment Production
Capability**

**Automation and
Smartization**

Quality management

**Comprehensive
after-sales service**

Major Product Categories

Computing

- Notebook PC
- Desktop PC
- Motherboard
- AI Server & Cloud Computing
- Edge Computing
- AI NB

Artificial Intelligence

- Digital Twins
- AI-enabled SOP analysis
- Vision AI

Automotive

- ADAS Computing
- Lidar
- IVI & eCockpit
- Body Controller
- EVSE
- Powertrain
- Infotainment system
- EV ECU
- Two-wheeler

IoT & Smart appliances

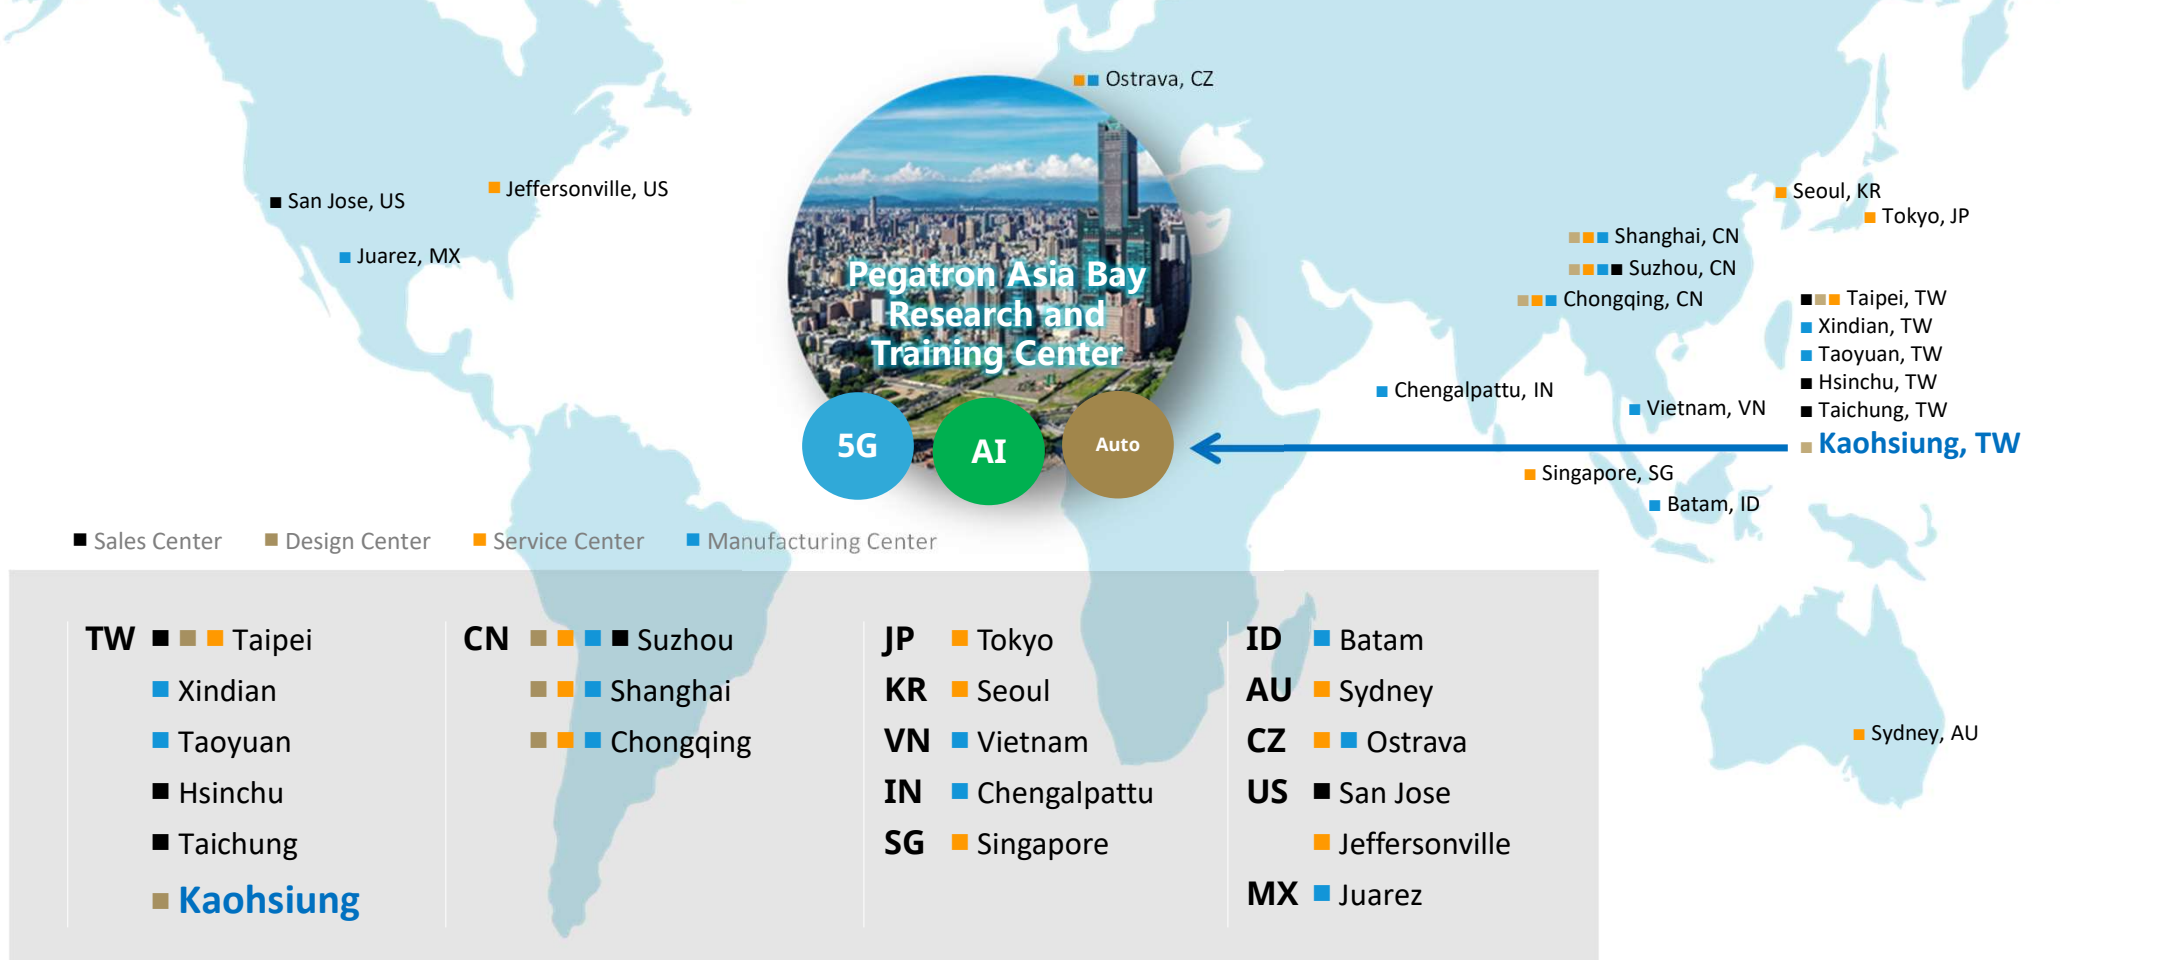

- AR/VR
- Headset
- Game console
- AIOT
- Exercise Equipment
- E-cigarette
- Smart helmet
- Healthcare

Communication devices

- Smartphone
- 5G O-RAN
- Network Switch
- Cable Modem
- Set-Top Box
- Access point, FWA

Location

Pegatron E2E 5G Solution for Private Network

Digital Transformation Solution for Manufacturing

AI Capabilities: Enhancing computational power and data processing using artificial intelligence.

5G/6G Connectivity: More reliable communication and flexible production, promoting real-time data exchange and remote monitoring through 5G/6G.

Domain Knowledge: Industry-specific knowledge to train AI models (LLM/SLM) and tailor digital transformation strategies to the unique needs of different sectors.
